

Criteria

Title: Energy and resources Audits, conducted by a Danish experts to French industrials

Quality		70%
Qualifications and Competence of Staff		70%
Senior Consultant	75%	
General Qualifications	30%	
Adequacy for the Assignment	50%	
Experience in the Region and Language	20%	
Junior consultant	25%	
General Qualifications	30%	
Adequacy for the Assignment	50%	
Experience in the Region and Language	20%	
Price		30%
Total price-quality ratio		100%
Minimum level of performance		7.00
Budget		185,000.00 DKK

Method of Evaluation

The most economically advantageous tender will be identified based on the award criterion "best price-quality ratio" and the award criteria above.

A numerical score is allocated to each of the sub-criteria in relation to Quality depending on the assessed level of performance on a scale from 0 (Unacceptable) to 8 (Exceptional).

In the evaluation of the sub-criteria in relation to Quality, the responsible unit will on the basis of the descriptions in Appendix 2 consider how the tender fulfils the requirements in Appendix 1 and the extent to which the tender fulfils the wishes in Appendix 1, if any.

The points will be awarded individually. Therefore, it is possible that no tender will be awarded maximum points, just as two or more tenders may be awarded the same number of points.

Tenders that fail to achieve the **minimum level of performance** (total score in relation to Quality) are considered unacceptable and will be rejected.

The responsible unit's **maximum budget** (DKK) net of VAT in relation to the procurement is stated above. Tenders will be rejected if their Contract Price as defined in the Agreement and quoted in Appendix 2 exceed the responsible unit's maximum budget.

The responsible unit will evaluate the Price on the basis of the Contract Price as defined in the Agreement and quoted in Appendix 2 and award a numerical score on a scale from 0 to 8.

The tender with the lowest Price will be awarded a score of 8 points and the other tenders will be awarded points using the following formula:

$$\text{Points in relation to Price} = \text{lowest Price} * 8 / \text{Price}$$

The responsible unit will calculate the total score of the tender by weighting and adding the points in relation to Quality and the points in relation to Price. The tender with the highest score is deemed as the most economically advantageous tender and will be awarded the contract.

The responsible unit will calculate the total score of the tender by weighting and adding the points in relation to Quality. The tender with the highest score is deemed as the most economically advantageous tender and will be awarded the contract.
